NUMBER 3 MAY-JUNE

Viewpoint: First generation practices and second generation systems 223

The desk-sized computer—a modular approach 224
description of the Digiputer marketed by Muldivo Limited

Business information systems 227

New accent on accuracy 232
forms bearing pre-printed check digits enable a high standard of accuracy to be achieved in processing clinical test results

A second look at the NCC systems analysis course 235

Cybernetics and decision taking 238
a dynamic rather than a static approach to problems is now possible

Burroughs TC 500 terminal 242
a powerful terminal with its own storage and computing facilities

Cost/Volume ratio—a measure of efficiency 246

Topics 248
new equipment—applications—software

Speeding the flow of management information 258
how data collection units and a computer are used by a packaging firm

Company profile: Intercontinental Systems Inc. 264

Supplement Computer bureau and consultancy services

Outside assistance—the pros and cons 275

The turnkey concept 278

The software market 283

The place of the program package 285

The role of the large machine 289

A service for the smaller firm 293

Tables 297

NUMBER 4 JULY-AUGUST

Viewpoint: Datafair—a future link with Europe? 357

Series 20—a modular range of display units 358
description of a range of display units developed by Elliott Automation

Pawns in a magic game? 362
first in a series of articles examining the interrelationship of people, organisations and computers

Computers in banking 368
a general survey of the use of computers by British banking groups

Office computers from Philips 375
a new range of desk-sized computers which is having a great success

Topics 380
new equipment—applications—software

Control systems in business 390
some thoughts on the development of business control systems

Company profile: Crosfield Business Machines 392

Computing at the CEGB 398
computer usage in the electric power generating industry

Linear programming 400
an optimising technique which can be applied in a variety of situations

Supplement Datafair 69

By the people and for the people 411

Some facts about Datafair 69 413

Research in the computer industry 414

The changing hardware/software relationship 421

Measuring program behaviour 425

Impact of the small computer 429

Mark reading—a solution to the input problem 433

NUMBER 5 SEPTEMBER-OCTOBER

Viewpoint: Decimalisation—much still to be done 467

Installing a computer—one company's approach 468
The problems encountered by companies installing a computer are manifold; outlined here is the approach adopted by United Dominions Trust

A standard sales and purchase ledger system 476
program packages often lack flexibility but this drawback has been overcome by Contract Computing Limited

The men in the machine 481
are computer people a special breed owing their allegiance to "the machine" rather than the organisation which employs them?

Computer-aided design at ICI 489
outline of the progress achieved by one of Britain's major industrial enterprises in the field of computer-aided design

Topics 496
new equipment—applications—software

Company profile: Farrington Data Processing 506

Honeywell 3200 and 4200 510
descriptions of two advanced systems at the upper end of the successful Honeywell Series 200 range

Supplement Decimalisation

The computer and decimalisation 523

Conversion and the keyboard machine 525

The IBM decimalisation programme 527

Size and scope of the problem 533

Program conversion 537

The "across the board" approach 541

NUMBER 6 NOVEMBER-DECEMBER

Viewpoint: An intrusion into privacy? 575

Care of magnetic tape 576
outline of procedures and measures which should be adopted when handling and storing magnetic tape

Low-cost automatic message switching 580
description of the 600 ADX communication system developed by STC

Auditronic 770 582
a visible-record computer from Olivetti

"The Victims" 586
the concluding article of a series on the interrelationship of people, organisations and computers examines some of the changes brought about by computers

Project evaluation and profitability 593
Prosper is a package designed to help managers raise the standard of information flow within their organisation

Topics 604
new equipment—applications—software

Financing the computer 614
factors and criteria to be considered when buying, leasing or renting a computer

Viatron System 21 622
an inexpensive on-line terminal recently introduced in Britain

Supplement Computer accessories and ancillary equipment

Market for computer accessories and ancillary equipment 635

Speeding document flow 638

Tables 641

Forms handling equipment 647

In-House printing 651

Automatic labelling system: Microfilming continuous stationery 654

SUBJECT INDEX

A

Accuracy, new accent on 232
"Across the board" approach, the 541
Adamczewski, Bernard, Author 476
ADE (Automated Draughting Equipment) system 23
